

Definition of Ready Document

What is an example of a DoR?

A DoR lets your team know if a backlog item is ready for a sprint. Here’s a Definition of Ready example for a bug fix:

A bug fix might've lingered on your backlog, but now you can move it up. That's because your team:

- **Determined that it’s actionable.** The team feels the bug fix is feasible and independent of other tasks.
- **Established a shared understanding.** The team collectively grasps what the bug fix entails. They know what they need to make it happen.
- **Know its value.** The team understands the impact of the bug fix on customers and the business.
- **Set criteria and a timeline for completion.** The team estimates the time to complete the fix based on key benchmarks.
- **Believes the bug fix is testable and verifiable.** The team can test the fix to see if it works and demonstrate it to stakeholders.

Type	Summary	Priority	User Story
	Match Notifications	== Medi...	As a user, I want to receive a notification when I have matched with So that I can be informed of new matches to reach out to and form connections with.
	Delete Account	> High	As a user, I want to be able to delete my account,So that I can remove information associated with my account from the database.
