Story Point Forecast

ℹ️ Each person should forecast how many story point they think they can complete in a spring and explain their justification

@Kirsten Huttar - 10 points a sprint (3-4 pts per week) With my other commitments I'm comfortable estimating that could get in one medium task a week

@Chris Wilder - ~10 points a sprint (3-4 pts per week) Considering the knowledge acquisition required, I will guesstimate 3-4 points a week for this sprint (hopefully 1-2 tasks a week!)

@Prudhvi prasad samudrala -10 points a sprint (3-4pts per week) based on my available timings and knowledge acquisition required, i could get in one task a week

@Louis Muhammad 10 points per sprint. NextJS framework and Prisma orm are tools that I've never used, and learning how to properly, and my additional class and work commitments leave me feeling comfortable with estimating 10 points per sprint.

@John Pranoy Yalla 10 points per sprint. I am still getting familiar with NextJs. Considering the other school work, GTA work and research work; I can target to complete 1 story this sprint maybe Medium/High priority story

@Yaswitha - 10 points a sprint
